

Medication Repeats

Veterinary surgeons are governed by legislation regarding prescribed medications. This requires each pet to be examined regularly. While we can extend medication repeats for 6 months, there will be cases that require more frequent assessment before medications can be dispensed. Your veterinarian will discuss this with you when your first script is provided. We are unable to dispense restricted medications on repeat.

Melville Animal Hospital is not able to provide scripts filled over the counter as we are not set up as a pharmacy. Our veterinarians dispense each script and they are checked and signed off before we contact you for collection. Please allow 24 hours for scripts to be filled.

Please email or drop this form in for repeat medications and you will be contacted via SMS or phone when they are ready for collection. Please fill in all parts of the script details so we have all your information ready for our veterinarians.

Today's Date:	
Pets Name and Surname:	
Name of Medication Required and strength (mg) as written on label previously:	
Current dose as described on label (amount and times per day)	
Do you have enough medication for the next 24 hrs:	
Has there been any change in your pet's condition. Is your pet well at the moment?
